Dear Beth,

During our recent building expansion, King's Way Church used Spain Commercial to convert 7,000 square feet of basement, into educational space with a fellowship hall and warming kitchen. The water fixtures used for this building project comply with the standards for conservation measures (please see attached specifications). Since the construction did not involve disturbing land (like that of a new construction) there was not any need to use plants or shrubs for landscaping purposes. The vegetation, already in place, was adequate for county requirements.

I trust that this information will help to satisfy the requirements for issuing a permanent certificate of occupancy for our recent construction. If you have any further questions, please don't hesitate to contact us.

Sincerely,

Dr. Steven D. Suders
Sr. Pastor
